

NEW DOMESTIC FIRE DETECTION LEGISLATION **- smoke, heat and CO detectors**

A new standard for domestic home fire detection was due to come into force from February 2021. This has now been delayed provisionally until February 2022

The standard requires:

- *One smoke alarm installed in the room most frequently used for general daytime living purposes – this may be your living room*
- *One smoke alarm in every circulation space on each storey, such as hallways and landings*
- *One heat alarm installed in every kitchen*
- *All alarms should be ceiling mounted and interlinked.*
- *Where there is a carbon-fuelled appliance such as a gas boiler, an open fire or a gas heater present, a carbon monoxide detector is also required which does not need to be linked to the fire detection.*

The purpose of this new standard is to enhance the fire detection in your home and to try to keep you safer.

www.gov.scot/publications/fire-and-smoke-alarms-in-scottish-homes/

For eligible clients, Care and Repair can install suitable wireless interlinked Smoke and Heat detectors and Carbon Monoxide detectors, if required, all with a 10 year battery life to make your property compliant with legislation and safer for you. Please call **01555 666 200** for further information.

To be eligible for this Care and Repair service clients must:

- Live in South Lanarkshire
- Live in a house that is owned by you
- One of the members of the household must be over 65 years of age or living with a physical or mental disability
