

Care & Repair Fire Detection Keeping Residents in Lanarkshire Safe

**Limited
Offer**

We know that there are still people in Lanarkshire with limited or no fire detection at all and this puts these people at risk from fire and smoke inhalation.

Installing fire detection is also not cheap!

Funding to assist clients in Lanarkshire with the installation of fire detection has now been exhausted. Due to this we are no longer able to install fire detection free-of-charge.

The new legislation is designed to keep clients safer in their own homes by interlinking the alarms and ensuring you have enough alarms in the home to cover the whole house.

We know that this change is expensive for clients, so, to help ensure that as many clients as possible can afford to change their fire detection, we have decided to offer the supply and installation of devices at a **discounted rate for a limited time.**

**We can install all required devices for only £18 per device plus
Only £12 for entire installation** (all costs quoted include VAT).

Sample costs are provided below for guidance.

BUNGALOW

SUPPLY & FIT:

- 2 SMOKE DETECTORS
- 1 HEAT DETECTOR
- 1 CO DETECTOR

£84 INC VAT

2 STOREY HOUSE

SUPPLY AND FIT:

- 3 SMOKE DETECTORS
- 1 HEAT DETECTOR
